Price **FORMULA:** The bidder with the lowest price receives the maximum score. The bidder with the next lowest dividing its price into the next lowest price and multiplying that percentage by the available points. For example: Next, assume that \$50,000 is the low offer. That bidder would receive 40 points for price ( $\$50,000/\$50,000 = 1.00$ ). Next low offer, then that bidder would receive 36.364 points ( $\$50,000/\$55,000 = 0.9091 \times 40 = 36.364$ ), etc.
