City Manager's Office
City of Grand Prairie

To the Honorable Mayor and City Officials

Re: Status Update on Atmos Energy Corporation's Mid-Tex Division's Filing

As you are aware, on February 27, 2015, Atmos Energy Corporation ("Atmos Energy") filed the 2015 annual Rate Review Mechanism ("RRM") with your city while the 2014 RRM was still under appeal. On May 7, 2015, the Company and the representatives of the two coalitions of cities served by Atmos Energy's Mid-Tex Division have agreed to settle the 2014 and 2015 RRM filings. Pursuant to this agreement, Atmos Energy's Mid-Tex Division has agreed to lower the requested rate increase from \$1.32 per month for the average residential customers to \$0.97 or 1.63% on the average residential bill over currently billed rates.

Attached to this letter as Attachment A are revised copies of the tariffs required to implement the RRM rates. These tariffs include: R-Residential Sales, C-Commercial Sales, I-Industrial Sales, T-Transportation Sales and Rider WNA-Weather Normalization Adjustment. Please note that these revised tariff pages reflect a downward adjustment from tariff pages Atmos Energy provided to you on February 27, 2015 and should be substituted for the tariff book previously provided to you.

Atmos Energy appreciates your partnership in providing service to the citizens of your community. This filing is for informative purposes and no action is required on your City's part, beyond what has been recommended by your coalition representative.

Should you have any questions, please contact your local Atmos Energy Manager of Public Affairs.

Sincerely,

A handwritten signature in black ink, appearing to read "Christopher Felan".

RIDER:	WNA – WEATHER NORMALIZATION ADJUSTMENT	
APPLICABLE TO:	ALL CUSTOMERS IN THE MID-TEX DIVISION EXCEPT THE CITY OF DALLAS AND UNINCORPORATED AREAS	
EFFECTIVE DATE:	Bills Rendered on or after 11/01/2015	PAGE:

Provisions for Adjustment

The Commodity Charge per Ccf (100 cubic feet) for gas service set forth in any Rate Schedules utilized by the cities of the Mid-Tex Division service area for determining normalized winter period revenues shall be adjusted by an amount hereinafter described, which amount is referred to as the "Weather Normalization Adjustment." The Weather Normalization Adjustment shall apply to all temperature sensitive residential and commercial bills based on meters read during the revenue months of November through April. The five regional weather stations are Abilene, Austin, Dallas, Waco, and Wichita Falls.

Computation of Weather Normalization Adjustment

The Weather Normalization Adjustment Factor shall be computed to the nearest one-hundredth cent per Ccf by the following formula:

$$WNAF_i = R_i \frac{(HSF_i \times (NDD-ADD))}{(BL_i + (HSF_i \times ADD))}$$

Where

i = any particular Rate Schedule or billing classification within any such particular Rate Schedule that contains more than one billing classification

$WNAF_i$ = Weather Normalization Adjustment Factor for the i^{th} rate schedule or classification expressed in cents per Ccf

R_i = Commodity Charge rate of temperature sensitive sales for the i^{th} schedule or classification.

HSF_i = heat sensitive factor for the i^{th} schedule or classification divided by the average bill count in that class

NDD = billing cycle normal heating degree days calculated as the simple ten-year average of actual heating degree days.

ADD = billing cycle actual heating degree days.

BL_i = base load sales for the i^{th} schedule or classification divided by the average bill count in that class

The Weather Normalization Adjustment for the j th customer in i th rate schedule is computed as:

$$WNA_j = WNAF_i \times q_{ij}$$

Where q_{ij} is the relevant sales quantity for the j th customer in i th rate schedule.
