SUP SITE PLAN FOR Rising Stars Christian Academy
5103 Magna Carta Blvd. STE 110
Grand Prairie, Texas 75052

OPERATIONAL PLAN

This facility will be used as daycare center under the name Rising Stars Christian Academy. Our hours of operation will be from 6:00am-7:00pm, Monday through Friday. The estimated capacity of the number of children that will be in care is 100. These children will range in age from 6 weeks to 12 years of age. There will be at least 15 caregivers or more in the facility. This number will be dependent on the amount of children in care.

Rising Stars Christian Academy will provide safe, affordable and high quality child care for the students in our community. Our goal is to prepare children to excel academically when they enter into kindergarten, all done utilizing Christian principals taught through the A-beka curriculum. We will also provide before school and after school care for school age children. This service will provide transportation to these students by properly trained and licensed staff. All vehicles used for this service will be compliant with local and state regulations, to include proper inspection and registration tags. The vans will be equipped with fire extinguishers, first aid kits, emergency contact information for each student, and an attendance sheet to be checked upon entrance to the van and exits from the van. These vehicles will be properly insured per state and local regulations.

The building that will be used to operate this daycare center will have liability insurance equal to a minimum of \$1,000,000 in coverage.

Food will be available to all children in attendance and will be prepared on-site in our city and state inspected kitchen. Our kitchen has been inspected and approved by both environmental services and the fire department. Breakfast, lunch and an afternoon snack will be made available to the children. Breakfast will be served at 7:00am. Lunch will begin at 11:00am and the afternoon snack will be served at 2:30 pm.

An outside play area that measures approximately 1500 square feet will be located at the back of the facility. The entrance to this area is accessible from the back door and the children will step directly onto this site upon exiting the building. There will be 2 exit gates located in this area, as well as a sliding door, which has been approved through the permitting process. Everyone will use the main entrance at the front of the building to enter the center. The back door will only be used in the event of emergencies, as well as for the children to use the outside play area.
